

British Veterinary Camelid Society Conference 2010

2nd & 3rd October 2010

Infectious disease in South American Camelids & Update from International Camelid Conference

Venue: Touchbase & Premier Inn, Peterborough
Norman Cross, A1(M) Junction 16, Peterborough, Cambs. PE7 3TB

PROGRAMME

The overall theme of this year's conference is fact and evidence gathering regarding infectious diseases in camelids (including parasites). We will aim to establish risk, likely epidemiology, and suitable control, including biosecurity for various farm set-ups. There will be a good deal of audience participation during breakout sessions.
